Dear Sir,

GROUPWARE SOFTWARE PROPOSAL

We are a dynamic, innovative and customer focused company providing technology solutions that empower businesses to be more productive save cost and maximize profit.

We believe every business is unique with unique products and services that needs attention to meet customer's needs, which is why we take technology stress off your business so you can focus on what you are good at while we support your growth with our technology.

Fast Cloud has a group of experienced software engineers with demonstrated expertise in Desktop and Mobile Software development with modern technologies. We will be delighted to work on your project and deliver your project on time on specification and within budget.

Refer to details below the development requirement to deliver on the project.

We shall submit our project plan and Service Level Agreement (SLA) when we have reached a deal to commence the project.

Kind Regards
Peter Mfoniso
09041580877

PROJECT OVERVIEW:

Development of a modern collaboration groupware software using current technologies and migration of existing software data to synchronize with current implementation, while keeping existing messaging system.

Groupware: Web Base Human Resources Management with Email Client Administration, Payroll and Request & Approvals.

| TOTAL COST | NGN 27,000,000.00 |
| INITIAL DEPOSIT | 80% |
| BALANCE | 20% |

How We Work

- **Project Analysis:**
We will study your software requirement project and draw out actionable areas to enable swift completion of your project.
- **Design Prototype:**
After a good understanding of your project, we shall develop a design prototype showing how your project will look like when it is completed. During this period our client will have to approve the prototype, if there are observation or modification we shall implement such change before development commences.
- **Project Development Methodology:** We use agile project management and design methodology; this enables us to deliver project faster so the client can start using the product even before it is completed.
